

PROFESSIONAL DEVELOPMENT FOR COASTAL MANAGEMENT

Envision have considerable experience in the design and delivery of professional development and capacity building to support coastal management and planning. As well as providing bespoke training courses and workshops, activities have also included counterpart/mentor training and the production of supporting materials for training and professional development.

Training and professional development provided by Envision is founded on their experience in working on projects developing coastal management recommendations, plans and strategies from the UK, European and other countries across the Mediterranean, Gulf States, South and Southeast Asia and the Americas. Example projects are:

Examples of manuals and guides to support training activity produced by Envision. Supporting materials provide a training resource for participants after training events.

Envision staff facilitating a field visit to explore coastal development pressures in India.

Developing training capacity in India: Envision Staff implemented a DfID funded project to support ICM Training at two Indian Universities: Anna University, Tamil Nadu and Jadavpur University, West Bengal to sustainably establish:

- the capability to train key personnel in ICZM,
- the capacity to provide relevant advice to the Indian Government on ICZM issues.

The project executed two parallel themes:

- training of Trainer programme to provide high quality professional training,
- curriculum design and provision of short courses in ICZM.

Designing Schools of Excellence in coastal management in NW Europe: Funded under the INTERREG IIIB programme, the COastal REsearch and POLicy INTegration (COREPOINT) project assessed progress the development and implementation of Integrated Coastal Zone Management (ICZM) solutions. Envision developed “Schools of Excellence” in ICZM for local practitioners and implemented them in 4 countries. The schools developed a mixture of expert-led presentations, case studies and working exercises. Other activities in this project involved working with local partners and stakeholders involved in coastal management activities to carry out an ICZM review and a stocktake of NE England with a view to building new approaches to coastal planning and development.

Facilitated discussion on coastal planning with local authority planners and line agencies as part of a COREPOINT School of Excellence in ICZM.
